A glossary program written in PHP (4.2.1) that utilizes PostgreSQL and Smarty Templates. It allows you to add, edit and delete terms. The database can be searched by the term field, the definition field or both, as well as by character (A-Z, 0-9). Visitors can suggest words, and they won't be published until you approve them. Has add/edit/delete functions for words, definitions, and users. Users can be sepereated from "Admins" so they don't get full priviledges.
