Plug-a-thug

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This script creates a small table on your webpage where other webmasters can plug their websites. It displays their site name as a hyperlink pointing to their URL. You can edit every attribute including how many plugs to show at one time and much much more. Only 2 files total and 1 chmoding needed. A live demo available on the author's homepage.
