

plusPHP Affiliate Links Manager & Statistics

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

All-in-one solution to cloak your sponsors' and affiliate links, manage them (CSV import/export, mass add/delete operations) and track clicks (timing, source site and page, visitors' IP with possibility to track country/city). Application compatible with Google AdWords and Google Analytics tracking system. Application has password-protected interface with brute force protection. Software is ideal solution to handle affiliate links and track clicks in case if you want to cloak/protect your links from malicious users and ads-cutting software which may remove your IDs and/or all links to affiliate sites. Statistic module allows to track every visit - referring page and domain, timing and visitors IP addresses (and with geo-data - country, city, zip - with external service) - to be sure your affiliates (CJ and ClickBank for example) display correct data. Application has frame redirect mode to cloak target URLs (frame may contain link back to your site).
