

# Presentation Of Hierarchical Data

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

Multiple level select boxes tackled with hierarchical data! This sample illustrates the concept using a hierarchy consisting of geographical region, country, and state data. The code expects a system DSN by name "Hierarchy" and accesses the database using the user id "sa" with a blank password. The database is created in SQL Server 7.0.
