Mobile Number	{value_mobile_number}
Email	{value_email}

Prevent unauthorized viewing of website javascript and style sheet files. Simply rename all your style and javascript files to the .asp extension. Then include the validate_view.asp file at the top of each file. Open the validate_view.asp file and change the top the constants to those required. Then finally call the procedure name "validate_view" with the current files content type as the parameter.
