

# PseudoRequestDictionary

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

The PseudoRequestDictionary is created to behave similarly to the standard IIS Request and similarly to several fileupload components that can be found. Advantages: no need to install any components; It is free code and you can adapt the code to your desires; It is not read-only (IRequestDictionary is read-only). You can add, remove and change key/value pairs whenever you like; Handles forms > 100 kb.
