

Randomizing Javascript - What can randomization be used for in Javascript/jQuery?

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Building the random number generator - Using the following line to return a random number:
`Math.floor((Math.random() * 100000000) + 1);` Building further randomization into the random number generator - To further randomize, you can use power law distribution. Random number generator using the following line code: `Math.round(Math.exp(Math.random()*Math.log(10000000-0+1)))+0;` Demo includes way to create a random quote generator and random image loader
