

Reading Flash File Information (.swf) through an ASP Page

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This is a simple tip that presents an ASP class that can read the properties of a Macromedia Flash file (a .swf file). You can use this handy class to read the height, width, version, file length, twips readings, frame rate, and frame count of a Flash file on your Web server.
