

## **Redirect Scripts**

Address {value\_address}

Contact Person{value\_contact\_person}Mobile Number{value\_mobile\_number}

**Email** {value\_email}

Three scripts that show how a browser can be redirected to a different page with JavaScript. They are useful if you want to rename or move a page that has links to it from other locations. You can put the redirect script in the old page, to send visitors to the new one. You can choose: Stealth Redirect, Alert Redirect or Confirm Redirect.
