SafeSystem

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

SafeSystem allows you to prevent access to your personal and important files and folders, as well as protect and guarantee the integrity and well functioning of your system. It can make your files and folders completely invisible, inaccessible or simply read-only and prevent the change of configuration and the accidental (or even intentional) system files deletion or alteration, so your PC will be healthy and more stable.
