

# SetaPDF-FormFiller API Lite

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

The SetaPDF-FormFiller API Lite lets you (pre-)fill in textfields of PDF forms programmatically. But this API is not limited to filling in conventional PDF forms. It is also suitable for the personalization of existing PDF documents. The major benefit: developers don't have to know any positioning information, but only the name of the form field - the positioning is done by the API.
