

Seven Simple Steps

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Using point and click technology, Seven Simple Steps allows you to generate Database Aware Web Sites. The output of this product is Smart Web Forms. Includes a wizard format to walk you through seven steps, and create complete web site in minutes. Advanced features include: Multi-Column Sorting, Page Skipper (record-set navigator), Screen Security Access, UNDO changes (Rollback - Data Insurance), Complete Navigation System, and Creates Combo's from lookup tables. It generates all the SQL/HTML/Javascript/ASP necessary to manage site, and the generated code is easy to edit, and nothing is hidden. Databases supported: Access, SQL Server, Oracle, DB2.
