

# SPAMbaffle

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

Fully configurable SPAM/virus filter for qmail servers. Set up in five minutes. Free trial version download. Each user may set up their own filtering rules and/or use global rules. Filter any header, the body, attachment filenames, and MIME types. Bounce or drop blocked messages. Use custom bounce messages to tell non-SPAMmers how to get email through in case of false positives, or to alert people infected with worms that they need to disinfect. Full version: \$70 per server or \$175 per company.
