

Spambot Hider

| | |
|-----------------------|------------------------|
| Address | {value_address} |
| Contact Person | {value_contact_person} |
| Mobile Number | {value_mobile_number} |
| Email | {value_email} |

A very easy to use script that allows you to hide your email address from spambots; simply send the image a base64 encoded string of your email address, along with colour information, and the php script returns a decoded image. Looking at the source will also help you learn about the basics of image creation using PHP.
