

SQL Query Parser, Perl Edition

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

SQL Query Parser will generate MySQL "LIKE" search statements for use in searching a database. Supports AND, OR , NOT and Phrase Search by prefixing search keywords with a +, -, | and "". Similarity to the syntax implemented by Altavista and Google allows your users to search intuitively. Now you can implement a more advance search engine in minutes.
