SQL Stripes is an application that helps you - the SQL Server DBA, to have complete control over your servers. From the high-level of monitoring essential components to the low-level of analyzing your various databases. This is not another Query-Analyzer like tool, not does it intend to be. The idea is that each one of your servers gets a 'Stripe' which contains valuable real-time data on the selected server. SQL Stripes is an intuitive and easy to use component, and is intended for SQL Server DBA's Note that it is still on it's first betas so please report any problem that occurs.
