Visitors can create personal pages for their subjects of interest. As a motivation they can make money by placing ads on the page they create. The script has build in functionality for Amazon, Ebay, Cafepres, Flickr and many more can be integrated. Some of the functionality includes: 1. Creation of pages with information 2. The site is divided into modules - each with its own functionality. 3. The modules are easy to edit and populating with information. 4. Retrieving information from other sites, e.g. trade sites like Ebay.com, Amazon.com. 5. Entry of site in groups. 6. Assigning of labels (tags). 7. Voting system and evaluation of the content. 8. Administration of the content - forbid/allow of web sites from the administrator, managing of groups and modules. There are a lot more features but unfortunately the space for description here is limited. Please visit the author's website for more information, demo and screenshots.
