StatsRemote checks the statistics of your affiliate programs and pay-per-click search engines automatically. There is no need to manually login to each stats area anymore as this software does it all for you. Stats Remote reads and displays your hits, sales and $$$ directly from the stats areas of the affiliate programs and ppc search engines, so you have all the numbers right in front of you. In addition, you can add custom income and expenses, e.g. server bills, traffic purchases, etc.
