The Data Markup Language (DataML)

Address {value_address}

Contact Person{value_contact_person}Mobile Number{value_mobile_number}

{value_email}

DataML is a web server extension that could be integrated in any JAVA enambled web server. It provides a simple API to rapidly generate dynamic data driven charts, graphs and custom content, which will run on any standard Internet browser. DataML is a markup language designed to facilitate the creation of simple dynamic data driven reports with only few lines of XML code.
