# The Easy and Free PHP guestbook

**Address**                          {value_address}
**Contact Person**                   {value_contact_person}
**Mobile Number**                    {value_mobile_number}
**Email**                            {value_email}

The Easy PHP Guestbook is a simple FREE yet powerful php comments guestbook script with multiple advanced anti-spam features, that can turn any one of your existing html pages into an html guestbook, where your website visitors can leave their own comments. The script makes it extremely easy to build a guestbook/add comment feature that blends with your web site style, design and graphic layout. You can also use the provided template to build a website guestbook from scratch. The main features are: flat file based, no MySql or other databases required - Badwords and banned IPs list - Full e-mail notification and posts logs - Easy customization and blending in your own design - Private e-mail - Free support directly from the developer - Online admin section to configure the guestbook and delete posts. No manual editing of text files needed - Language text files, easy translation in your own language - Spam proof thanks to the captcha image verification system and badwords - No ads
