| **Address** | {value_address} |
| **Contact Person** | {value_contact_person} |
| **Mobile Number** | {value_mobile_number} |
| **Email** | {value_email} |

Using a simple server-side include (SSI), ASP developers can use TraceLog's simple but powerful tracing facilities to view events on remote web servers straight from an Internet-enabled Windows PC <p> TraceLog events are easily added to new or existing ASP scripts using a single line of code. Each event includes: <p> The Form collection<br> The QueryString collection<br> The Session collection<br> The Cookie collection<br> <p> This information makes TraceLog perfect for speeding up development or helping to support ASP-driven sites
