

UnlimitedFTP Secure - Secure FTP applet with SFTP and FTPS support

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

UnlimitedFTP Secure allows you to embed a full-featured FTP client right into a web page. Simply put, users do not need to know how to install or configure an FTP client in order to transfer files to your FTP server. Authentication can be manual, automatic, or based on your web application. With UnlimitedFTP, you can create a smooth experience for users and never need to explain FTP client configuration again. The Secure version of UnlimitedFTP allows connections over SFTP or FTPS (active/passive)
