Email	{value_email}

User Engine.NET Pro is a User Signup and Authentication / Members Area System with administrator area. It uses MS Access 2000 or SQL Server databases to store user login details. Features an admin area where users can be queried/viewed, template based html error pages, signup, login, forgotten password, and edit profile functions. Secure your web pages by adding a small one line header which redirects the user to the login page if not signed in...
