vBulletin FLASH CHAT MODULE

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

FlashComs chat and messenger applications are fully compatible with vBulletin. They are positioned to be the most innovative and feature-rich applications among flash based solutions. Video/audio options as well as basic text chatting provide real time communication experience to website members. Such features like multi-room, one-to-one conversatoins, flexible video window positioning, personal settings, friend/block lists, complete integration with existing users database and many more makes Flashcoms applications all-sufficient and easy to use solutions for both members and owner. The latest version of Community Video Chat boasts of implementation ultra-modern features for flash based software, namely built-in whiteboard, instant messengers support, online games, MP3 player and more. Number of available plugins brings flexibility in chat/messenger configuration and allows meeting requirements of business and entertainment orientated websites.
