If you want to share USB devices over network and Internet use Our software supports many kinds of USB devices such as printers, scanners, flash-memory, Human input devices etc. The software is easy-to-use & is highly SECURE. meets such needs as: - Need to get remote access to USB equipment - Need to share USB devices - Need to give access to USB device to multiple remote machines - Need to get connected to multiple USB devices from 1 remote machine - Need to access USB device from anywhere anytime - Need in wireless network. If there is WLAN station with USB hub on board, it is possible to interact with equipment connected to the station just as if it was physically linked up to computer ports using our technology. We offer to use our technology in the following (mostly demanded) implementation areas: Security and Monitoring Systems, Synchronization Systems, Providing shared access to USB equipment, medicine, science and education.
