<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

Web Header is a specially designed .NET component, which manages and customizes all HEAD tags for your web pages. Web Header Manager will help you easily manage your META tags (TITLE, KEYWORDS, DESCRIPTION) for better promotion and positioning your site in all search engines. With management of STYLES section and linking with CSS files you can automatically customize the design of your web pages. This feature allows providing your site visitors with the ability to choose the appearance of your site's pages from the set of predefined templates. The run-time management of SCRIPT section can change the client-side functionality of your pages.
