Wordpress Data Manager - toronet

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Programmers can use the plugin to create data managing features by employing fast and simple data managing functionality which gives developers more time to focus on advance features such as special views and galleries. You are able to control and define what the user sees on their screen and in addition, you can save time when developing back-end UI for managing your data.
