

WYSIWYG Spell Checker

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Using openWYSIWYG (www.openwebware.com) is a great way to add a rich text editor to your textareas. A must when creating a content management system. We have taken it a step further and developed a spell checker for the openWYSIWYG system. Our spell check uses the Google API to check your words and indicate which ones may be spelled wrong. You can then select from a list of words to replace your misspelled words.
