Xcripter is a framework for database driven code generation: Asp, Html, JavaScript. Its technology is based in pipelines of Xml Transformations, and guided by Visual Basic Classes. It is very easy to use: 1. Select a Database, 2. Select a Table, 3. Press the button 'Generate Script'. It includes the Table Schema in XML format, An ASP Script that lists the table, and the Form associated with the table in HTML and with a lot of javascript validations.
