

Xin Obfuscator

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Xin Obfuscator will filter out the Javascript/HTML/CSS/DHTML reserved words and generate the word list from the source content. The word list can be modified to specify customized obfuscation. It will remove white space, and line-feeds if wanted. The original/obfuscated word pair list will also be generated after obfuscation.
