Mobile Number	{value_mobile_number}
Email	{value_email}

XML/SWF Charts is a simple, yet powerful tool to create attractive web charts from dynamic XML data. Create an XML source to describe a chart, then pass it to this tool's flash file to generate the chart. The same tool also accepts PHP sources. XML/SWF Charts makes the best of both the XML and SWF worlds. XML provides flexible data generation, and Flash provides the best display quality.
