

# Zone Coaster's Survey

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

A versatile survey script which can handle any survey form with more than one input(so long as it doesn't have inputs with the same name which can be multiply-selected) and sort them at runtime. It can also handle multiple surveys. This means you now only need one script to run as many surveys as you have space for.
