ZZEE PHPExe compiles PHP, HTML, Javascript and other web files into Windows GUI programs. You can rapidly develop Windows GUI applications by employing the familiar PHP web paradigm. You can use the same code for online and Windows applications with little or no modification. Benefits: - Applications compiled with ZZEE PHPExe look and behave like standard Windows GUI applications. - You can distribute your compiled applications royalty free. - Users don't see the contents of your web files or your web file tree, they can not change your scripts. - Integrated PHP encoder - no need to use third-party products for protection of your code. - UI based compiler, easily create and maintain your projects. - You can name compiled exe files as you like and you can assign your own icons to them. - Runtime size can be as low as 2.1Mb (depends on number of PHP extensions that your application uses and your code size). - Advanced alternative to HTAs (HTML applications).
